WORK EXPERIENCE

Frontend Developer Intern - *SkillWalkers (Mar'24 - June'24)*
- Being part of a startup means wearing many hats, and I thrive in our fast-paced agile environment. I contribute to daily stand-ups, sprint planning, and reviews, where we all come together to share ideas and push our projects forward.
- Work closely with the team to build and refine web applications that meet the unique needs., using a mix of HTML, CSS, JavaScript, Next.js, and many such technologies to create responsive designs that look great and work well on any device.

Fullstack Developer - *Rhythmicstan Pvt Ltd (Dec'24 - Mar'24)*
- Designed, developed and maintained fully responsive, cross-browser compatible websites for the company.
- Created an additional revenue stream by generating leads and getting more clients by integrating features like calling, email.js and direct WhatsApp connection, while also employing SEO techniques for enhanced visibility, and search engine rankings.
- Collaborated directly with the CEO to conceptualize and implement front-end designs and functionality, optimizing UI/UX on the website.

PROJECTS

TEXTIN - Live Chat Web App | **Source Code** | **Link**
- Developed a real-time chat application using the MERN (MongoDB, Express.js, React, Node.js) stack.
- Implemented Socket.IO for real-time, bidirectional communication between clients and the server.
- Integrated user authentication and authorization using JWT to secure user data and sessions.
- Utilized MongoDB, multer and cloudinary for efficient data storage and retrieval of chat messages and user information.

GADGIFY - Ecommerce Web App | **Source Code** | **Link**
- Used the Context API to manage global state, ensuring a cohesive and efficient data flow throughout the application.
- Integrated advanced search filters to enhance the user experience.
- Ensured responsiveness across devices for seamless user experience.

LINKEDIN CLONE - Using Firestore | **Source Code** | **Link**
- Implemented user authentication using Firebase Authentication for a secure and dynamic user experience.
- Utilized Firebase Realtime Database for instant updates of all user-generated posts.
- Applied responsive design principles for optimal user interface across various devices and screen sizes.

YOUTUBE CLONE - Using RapidAPI | **Source Code** | **Link**
- Developed a dynamic YouTube clone using Rapid API for real-time video content fetching.
- Implemented features such as video playback and search functionality, closely mirroring the original YouTube experience.
- Ensured responsiveness on both desktop and mobile platforms.
